# **SUPA-LEAD**<sup>™</sup>

## **OVERDRIVE MKIII**

### **IT'S A NATURAL LEADER!**

The Supa-Lead Overdrive is a dynamic and touch sensitive OD that cleans up immediately as you lower the guitar volume control. Designed to get amp-like crunch tones from a clean or slightly dirty amp, it produces a focused midrange grind with an abundance of output volume to kick your amp over the edge.

# External Controls

- 1** VOLUME sets output level
- 2** DRIVE knob knob sets overdrive intensity
- 3** TONE knob adjusts tone from dark to bright
- 4** FOOTSWITCH toggles effect on / bypass  
(blue LED indicates on)

## POWER

The Supa-Lead™ Overdrive is powered by a single 9-volt battery, a 9-volt AC adapter such as the Dunlop ECB003, or the DC Brick™, Iso-Brick™, and Mini Iso-Brick™ power supplies. The power input is a 5.5mm x 2.1mm jack with the positive voltage on the outer sleeve. Using an external power supply will disconnect the battery. Disconnect the input jack to preserve battery life when not in use. The pedal will lock into bypass mode when it is time to change the battery. It also includes power protection circuitry to prevent damage from AC power supplies.

# Specifications

Input Impedance	> 500k $\Omega$
Output Impedance	< 5k $\Omega$
Noise Floor	-87 dBV
Bypass	True Relay
Current Draw	15 mA
Power Supply	DC 9 volts

All measurements made with controls at center. Noise measurements are A-weighted.
