CRY BABY® BB535 WAH REISSUE

# BASIC OPERATION

## CONTROLS

1. FOOTSWITCH turns pedal on/off. Green LED indicates ON. Push the toe of the pedal down until you feel a “click.” Rock your foot back and forth to shape the effect that the Cry Baby Wah has on the tone of your instrument instantaneously.
2. BOOST SELECTOR switch increases output as set by the VOLUME knob. Red LED indicates boost is active.
3. BOOST CONTROL knob sets gain boost up to +12dB.
4. WAH RANGE SELECTOR switch selects frequency range.

## POWER

The Cry Baby® BB535 Wah Reissue is powered by one 9-volt battery (accessed via underside of pedal), the Dunlop ECB003 9-volt adapter, or an MXR® Brick™ series power supply.

# SPECIFICATIONS

## IMPEDANCE

Input Impedance	1 M $\Omega$
Output Impedance	1 k $\Omega$

## WAH RANGE SELECTOR

1st Position (Full CCW)	444 to 2117 Hz
2nd Position	385 to 1888 Hz
